|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I microinterruttori di sicurezza delle protezioni devono essere collegati al circuito di emergenza della macchina = <b>PULSANTE DI EMERGENZA</b> . I microinterruttori delle nostre protezioni sono dotati di <b>N° 2 contatti NC e un NO</b> . Se il <b>PULSANTE DI Emergenza</b> è dotato di un solo contatto NC :il contatto NC (fili nero e bianco nero) del microinterruttore deve essere collegato in serie al contatto NC del pulsante . I rimanenti contatti devono essere isolati e lasciati liberi. | The safety switch must be connected to the emergency circuit of the machine = <b>EMERGENCY BUTTON</b> . The switching elements of our guards have: <b>two off NC (Normally Closed) and one off NO (Normally Open)</b> . If the EMERGENCY BUTTON has only one NC contact: The NC (black and white - black wire) of the microswitch must be connected in series to the NC contact of the button. The remaining contacts should be isolated and set free. | Les gardes de sécurité microinterrupteurs doivent être connectés au circuit d'urgence de la machine = <b>BOUTON D'URGENCE</b> . La commutation de notre gardes sont équipées <b>N°2 NC et contact N°1 NO</b> . Si le <b>BOUTON D'URGENCE</b> a un contact NC:le contact NC (fils noir et blanc noir) du micro doit être connectée en série avec le contact NC du bouton. Les contacts restants doivent être isolés et lâché. | El micro de seguridad debe estar conectado al circuito de emergencia de la máquina al igual que el pulsador de emergencia.El micro de nuestra protección está equipado con dos contactos NC y uno NO. Si el pulsador de emergencia está equipado con sólo un contacto NC, el contacto NC (cables negro y blanco negro) del microinterruptor debe estar conectado en serie con el botón de contacto NC. Los contactos restantes se deben aislar y se sueltan. | Der Sicherheitsmikroschalter muss an das Sicherheitskreis der Maschine (NOT-AUS-TASTE) angeschlossen werden. Die Mikroschalter unserer Schutzeinrichtungen sind mit zwei Öffnern (NC) und einem Schließer (NO) ausgestattet. Falls der <b>NOT-AUS-TASTE</b> mit nur einem Öffner vorgesehen ist, muss der Öffner des Mikroschalters (schwarz u. schwarz-weiß Kabel) dem Taste-Öffner in Reihe angeschlossen werden. Alle andere Kontakte müssen getrennt und losgelassen werden. |

| <p>Il riparo è destinato ad essere utilizzato su una macchina utensile, e lo schermo di protezione deve essere idoneo per eventuali proiezioni prevedibili (trucioli, rottura utensile, ecc.- si veda lo spessore della protezione); inoltre non deve essere soggetto a sbalzi di temperatura, a contatto con trucioli incandescenti e fluidi lubrificanti particolarmente acidi (alte concentrazioni). E' vietato utilizzare la protezione per arrestare gli organi mobili pericolosi (riparo senza dispositivo di bloccaggio all'apertura). E' vietato utilizzare la protezione, alla sua chiusura, per avviare gli organi mobili della macchina protetta (il circuito di sicurezza deve prevedere un comando di ripristino e di avviamento separati - a cura del cliente finale). In caso di riparo con sistema di bloccaggio, il cablaggio nel circuito di sblocco del riparo è a cura del cliente finale, e deve essere gestito in sicurezza.</p> <p>E' severamente vietato rimuovere la protezione. Sotto riportato il simbolo che indica il divieto di rimozione applicato sulla protezione.</p> | <p>The guard is designed for use on machine tools and the guard screen must be suitable for all foreseeable projections (swarf, tool breakage etc, see technical data (2.0) for protection thickness). Moreover, it must not be subjected to sudden changes of temperature, contact with red hot swarf or, in particular, acidic lube refrigerant fluid (high concentrations). The guard must not be used to stop dangerous moving parts (guard without opening blockage device). The guard must not be used, on closing, to start the secured machine moving parts (the safety circuit must provide a separate reset and start command by the end user). For a guard with blockage system, the wiring in the guard unlocking circuit is the responsibility of the end user and must be managed safely.</p> <p>It is strictly forbidden to remove the guard. This is indicated by the symbol attached to the screen.</p> | <p>Le protecteur est destiné à être utilisé sur une machine-outil, et l'écran de protection doit être en mesure de protéger, le cas échéant, contre toute projection prévisible (copeaux, rupture d'outil, etc.- voir l'épaisseur de la protection) ; par ailleurs, il ne doit pas être soumis à des variations de température et ne doit pas entrer en contact avec des copeaux incandescents ou des fluides lubrifiantes particulièrement acides (concentrations élevées). Il est interdit d'utiliser la protection pour arrêter les organes mobiles dangereux (protecteur dépourvu du dispositif de blocage à l'ouverture). Il est interdit d'utiliser la protection, lors de sa fermeture, pour faire démarrer les organes mobiles de la machine protégée (le circuit de sécurité doit prévoir une commande de réarmement et une commande de démarrage séparées - à la charge du client final). En cas de protecteur avec système de blocage, le câblage dans le circuit de déblocage du protecteur doit être exécuté par le client final et doit être géré en toute sécurité.</p> <p>Il est strictement interdit d'enlever la protection. Le symbole indiquant l'interdiction appliquée à la suppression de la protection.</p> | <p>La protección está destinada a utilizarse en una máquina herramienta similar, y la pantalla de protección debe ser adecuada para las posibles proyecciones (virutas, ruptura de la herramienta, etc. consultar el grosor de la protección); asimismo, no debe someterse a cambios bruscos de temperatura por contacto con virutas incandescentes y líquidos refrigerantes y lubricantes especialmente ácidos (concentraciones elevadas). Está prohibido utilizar la protección para detener los órganos móviles peligrosos (resguardo sin dispositivo de enclavamiento en la apertura). Está prohibido utilizar la protección, para que a su cierre, se produzca el arranque de los órganos móviles de la máquina protegida (el circuito de seguridad debe prever un rearme y arranque separados - a cargo del cliente final). En caso de resguardo con sistema de bloqueo el cableado del circuito de desbloqueo del resguardo correrá a cargo del cliente final y deberá realizarse con total seguridad.</p> <p>Está estrictamente prohibido quitar la protección. Este símbolo indica la prohibición expresa de la retirada de la protección.</p> | <p>Die Schutzeinrichtung ist auf anderen Werkzeugmaschinen zu verwenden. Der Schirm dient dazu, der Maschinenbediener von herumfliegenden Materialien (Spänen, gebrochene Teilen, usw. - Siehe Dicke des Polykarbonat) zu schützen und sollte keine Temperaturschwankungen erleiden oder mit heißen Spänen, sauren Kühlschmierstoffen (hohe Konzentration) nicht in Kontakt kommen. Sie muss nicht verwendet werden, um gefährliche bewegliche Teile zu stoppen (die Vorrichtung ohne Verriegelung öffnen). Es ist ebenso verboten, die Vorrichtung beim Schließen zu benutzen, um die bewegliche Teile der Maschine zu starten (der Endverbraucher/Monteuer soll separate Rückstellen- und Wiederanlauf-Befehle im Sicherheitskreis vorsehen). Im Fall von mit Verriegelungssystem ausgestatteten Schutzeinrichtungen muss der Endverbraucher die Verkabelung im Lösen-Kreis in ganze Sicherheit ergänzen.</p> <p>Es ist strengstens verboten, die Sicherheitsvorrichtung außer Kraft zu setzen. Hier unten finden Sie das auf der Vorrichtung angelegte Verbot-Piktogramm.</p> |

| <p>Prima di effettuare operazioni di smaltimento dei componenti che costituiscono il prodotto, consultare il fabbricante, che indicherà le modalità operative nel rispetto dei principi di sicurezza e di <b>salvaguardia ambientale</b>. Il prodotto <b>può essere smaltito senza bisogno di ridurlo in pezzi minuti</b>; è sufficiente scollegare i principali gruppi che la compongono e porli sul mezzo di trasporto adibito alla rottamazione. Provvedere a loro smaltimento operando in conformità alle norme vigenti, rivolgendosi agli organismi preposti e/o ad imprese specializzate nella rottamazione e/o nello smaltimento dei rifiuti, affinché avvenga la separazione tra materiale plastico, materiale metallico e componenti che devono essere inviati a raccolte differenziate. È obbligo del datore di lavoro essere a conoscenza delle leggi vigenti in merito nel proprio paese e operare in modo da ottemperare a tali legislazioni. È vietato ed inoltre passibile di sanzioni, abbandonare il prodotto nell'ambiente</p> | <p>Before you dispose of the components that make up the product, contact the manufacturer, who will be able to advise you regarding methods that comply with local environmental regulations. The product can be disposed of without being broken into small parts. Simply disassemble the main groups and bring them to waste collection. Dispose of them in compliance with current regulations, using agencies and/or firms specializing in scrapping and/or waste disposal, so that plastic material, metallic material and components that must be sent to the waste collection are separated. It is the responsibility of the employer to be aware of the laws in force in the country and comply with such legislation. It is also prohibited and punishable by law to leave the product in the environment.</p> | <p>Avant d'effectuer l'élimination des éléments qui composent le produit, contactez le fabricant, qui indiquera les modes de fonctionnement en conformité avec les principes de sécurité et de protection de l'environnement. Le produit peut être éliminé sans avoir besoin de le casser en petits morceaux: il suffit de débrancher les principaux groupes qui le composent et de les amener aux moyens de transport utilisés pour la destruction. Éliminer les faire fonctionner en conformité avec la réglementation en vigueur, s'adressant aux agences et / ou des entreprises spécialisées dans la mise au rebut et / ou de l'élimination des déchets, ainsi que la séparation entre la matière plastique, matériau métallique et des composants qui doivent être transmis à la collecte des déchets. Il appartient à l'employeur de connaître les lois en vigueur dans leur pays et sur le travail afin de se conformer à ces lois. Il est également interdit et passible de sanctions, laissez le produit dans l'environnement</p> | <p>Antes de llevar a cabo la eliminación de los componentes que conforman el producto, póngase en contacto con el fabricante, que le indicará los métodos de funcionamiento de conformidad con los principios de seguridad y protección del medio ambiente. El producto puede ser eliminado sin necesidad de dividirlo en partes más pequeñas: simplemente desconecte los principales grupos que la componen y lívelos a los medios de transporte utilizados para la destrucción. Deshágase de ellos en cumplimiento de la normativa vigente, dirigiéndose a los organismos y / o empresas especializadas en el desguace y / o eliminación de residuos, de forma que la separación entre el material plástico, material metálico y los componentes que debe enviarse a la recogida de residuos. Corresponde al empresario estar al tanto de las leyes vigentes en su país y sobre el trabajo con el fin de cumplir con dicha legislación. Le recordamos también que está prohibido y castigado penalmente, arrojar el producto al medio ambiente.</p> | <p>Bevor die Bauelemente der Schutzeinrichtung entsorgt werden, sollte man deren Hersteller befragen, um gemäß der Sicherheits- und <b>Umweltschutznormen</b> zu vorgehen. Es ist nicht nötig die Einrichtung abubrechen. Man braucht nur die wichtigsten Baugruppen abzutrennen und sie auf einem LKW oder einem anderen Mittel zur Verschrottung zu laden. Die Entsorgung soll gemäß der geltenden Normen durch in Verschrottung und Entsorgung spezialisierte Firmen erfolgen, die in der Lage sind, Kunststoff, Metalle oder andere Materialien gut zu sammeln und zu trennen. Dem Arbeitsgeber müssen die Richtlinien in Kraft in eigenem Land bewusst sein und er muss gemäß diese Rechtsvorschriften handeln. Es ist auch verboten und mit Strafen bedroht, das Produkt in die Umwelt abzugeben.</p> |
